Nu Guangxuan is a trainee seeking to learn more about organic farming at the Shared Harvest Farm. In the future, he hopes to open his own farm in collaboration with restaurants around China.

Extra context:

[Ni Guangxuan, 28, from Qinhuangdao, Hebei province. He's a trainee of the Little Donkey Farm (Shi Yan's first farm), and as part of the trainee program, he's working at Shared Harvest for 6 months. He used to be a cook and tried to run his own organic farm in Qinhuangdao between 2014 and 2018. He joined the trainee program to learn more about organic farming and how it works on a big farm. "I did everything myself on my farm, from farming to harvest, from packaging to sales, all by myself. Here everyone has their own job. There's a clear division of labor." In the future, he hopes to open his own farm that's supported by restaurants, inspired by the concept of Restaurant Supported Agriculture.]
